PROFESSIONAL SUMMARY

Highly motivated Junior Full-Stack Developer with expertise in the MERN stack (MongoDB, Express.js, React, Node.js) and a passion for building scalable, clean software solutions. Proven ability to develop robust applications featuring authentication, RESTful APIs, and AI-powered functionalities. Adept at creating responsive user interfaces with Tailwind CSS and committed to optimizing performance and fostering reusable frontend architectures.

WORK EXPERIENCE

Software Engineer

Jan 2022 - April 2026

Google · Remote

- Engineered core functionalities for a global search engine platform, demonstrating proficiency in large-scale system development.

EDUCATION

CSE

Sylhet Engineering College

SKILLS

DSA with C++	Proficient in Data Structures and Algorithms (DSA) with C++, successfully solving over 300 LeetCode problems to demonstrate strong algorithmic and problem-solving abilities.
React	Developed robust and responsive user interfaces using React.js, applying best practices in component-based architecture and state management for enhanced user experience.
NodeJS	Implemented scalable and efficient backend services using Node.js and Express.js, including RESTful API development and database integration for high-performance applications.

PROJECTS

PrepLab

GitHub · Live

Developed PrepLab, an AI-powered interview preparation platform leveraging natural language processing and machine learning algorithms to provide personalized feedback and practice exercises, thereby enhancing user readiness for technical interviews.
